

**AMES** is a company clearly oriented towards **technology and innovation** and has a strong **commitment to the community**. We want to be an organisation where all related individuals and groups (staff, customers, suppliers, shareholders and the society as a whole), can fulfill their expectations, both in the short and in the long term.

This statement entails the following commitments:

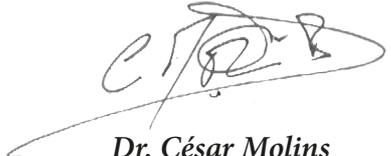

- To **personnel**, so that workers are able to develop and advance professionally and economically, while ensuring the highest level of safety for them.
- To **customers**, to fulfill their expectations from the technological, economic and service viewpoints.
- To **suppliers**, to stablish long lasting and reliable cooperation.
- To **shareholders**, to make their investment profitable over time.
- To **society**, to offer useful products and services and, therefore, to bring about improvement. To respect the **environment**, to create wealth for the rest of the country and to get involved in the towns or cities where **AMES** operates.

However, the accomplishment of these commitments requires as well that everyone involved with **AMES**, be it directly (**Personnel and Shareholders**) or indirectly contributing to its existence (**Customers, Suppliers and Society in general**) also fulfill their duties towards **AMES**:

- **Personnel** by contributing their personal commitment to professionalism, responsibility and concurrence with the general objectives of the Company.
- **Shareholders** by ensuring their commitment to keep and increase whenever possible, their investment.

and regarding the external players,

- From **Customers and Suppliers** we expect the fulfillment of their contractual commitments with the maximum diligence and efficiency.
- From **Society as a whole** we expect that the different governing bodies will continue to facilitate the development of **AMES** so that it will continue increasing the creation of wealth everywhere it is settled.

**Dr. César Molins**  
**General Director of AMES**
